Company Overview

Brisbane Alarm Monitoring Security Services (BAMSS) is a trusted South East Queensland-based security provider delivering smart electronic solutions for over a decade. With more than a century of combined technical expertise, we specialise in security, CCTV, access control, and monitoring systems that safeguard people, property, and information— 24 hours a day, seven days a week.

Our approach is defined by innovation, integrity, and a commitment to delivering exceptional customer experiences. We don't just supply systems; we create reliable, integrated solutions that ensure peace of mind and compliance for our clients.

Aged Care Security

In aged care, safety and trust go hand in hand. Families rely on providers to protect their loved ones, while facilities must balance compliance, risk management, and care delivery. BAMSS provides tailored aged care security systems that proactively address these challenges, creating safer and more transparent environments for residents, staff, and visitors alike.

Why Security Matters in Aged Care

Aged care facilities face unique security requirements beyond standard commercial operations. Our systems address key areas such as:

Resident Safety

Protecting vulnerable individuals from harm or unauthorised access.

Medication Security

Preventing unauthorised access to restricted storage areas.

Staff Support

Allowing care teams to focus on residents with confidence.

Visitor Management

Ensuring only authorised individuals access sensitive areas.

Compliance

Meeting strict Australian Aged Care Quality Standards and safety regulations.

With rising compliance expectations, a dependable security solution is essential— not optional.

Tailored Security Solutions for Aged Care

At BAMSS, we design bespoke systems that reflect your facility's layout, care model, and compliance needs.

Alarm Systems & Monitoring

24/7 monitored alarm systems protect entry points, medication storage, and staff-only zones. Video verification reduces false alarms and ensures rapid response to genuine incidents.

CCTV & Video Surveillance

High-definition cameras deliver crystal-clear coverage in all areas— from car parks to common spaces. Recorded footage supports investigations, compliance, & peace of mind for families.

Access Control

Manage entry permissions through staff cards, keypads, or biometrics, ensuring only authorised personnel access restricted areas.

Nurse Call & Communication Integration

Our systems integrate seamlessly with nurse call and intercom systems, helping staff respond quickly and coordinate effectively during emergencies.

Compliance & Peace of Mind

BAMSS systems are built to help providers meet accreditation standards and maintain transparency.

Our Solutions

-  Support **Aged Care Quality Standards** and audit requirements
-  Protect **sensitive resident data** and digital security
-  Enable **comprehensive reporting** for inspections & compliance
-  Offer **visibility and reassurance** for families

The BAMSS Approach

When you partner with BAMSS, you gain more than a security system — you gain a proactive, long-term partner.

Proactive Monitoring

Daily system checks and video verification ensure continuous protection.

Integration Expertise

We design systems that work seamlessly with your IT, nurse call, and communication platforms.

Scalable Solutions

From single-site operations to multi-facility networks, our systems grow with your needs.

Onsite & Remote Control

We provide hands-on training, responsive maintenance, and fast resolution of technical issues.

Why Choose BAMSS?

Experience

Proven track record delivering aged care security solutions across Queensland.

Innovation

Integrating leading-edge technologies for smarter, safer facilities.

Trust

Providing peace of mind for residents, families, and care teams.

Partnership

Long-term support to maintain compliance, performance, and reliability.
