# Creating safer spaces for every child

Avigilon Alta for childcare centers

# The challenge

Early learning educators carry one of the highest duties of care: protecting the well-being of young children, while also ensuring the safety of staff, families and visitors.

Incidents of unauthorized access, inadequate visitor management and staff misconduct have prompted educators and governments worldwide to strengthen their physical security standards. In Australia, for example, hundreds of childcare centers are being asked to participate in a national trial of CCTV after multiple allegations of child abuse by staff.<sup>1</sup> However, many centers face limited resources, space constraints and varying privacy laws.

To build trust with families and meet safety expectations, proactive and privacy-conscious security has become essential.

# Why Avigilon Alta for childcare centers

From nap areas to play spaces and outdoor yards, childcare providers can foster a safe, transparent and well-run environment with Avigilon Alta. This cloud-native security suite simplifies security by consolidating video, access control, sensors and visitor management into one easy-to-use platform.

## Safer spaces start with a fast, flexible setup

Alta solutions are quick and easy to deploy and use. Our cloud architecture removes the need for complex, costly and space-consuming on-site servers, so you can spend less time managing systems and more time caring for children.

## Know what's happening from nap areas to play spaces

Get 24/7 visibility across every part of your center with the ability to view live and recorded video from any device. Receive real-time alerts for unusual activity or forced access attempts, so you can act fast and reassure families.

## Data privacy you can trust for the families you serve

Protect children's safety while upholding strict privacy and cybersecurity standards with Alta's automatic, end-to-end encryption and security updates. Add extra login safeguards with single sign-on and multi-factor authentication.

## Security that grows with your center

As your center expands, Alta scales and adapts with you. Easily add new rooms, facilities or sites. Or protect your current investments by integrating third-party cameras, readers, sensors and software through our open APIs.

We have peace of mind that the facility is always secure, while providing easy access for staff. That's the beauty of the cloud.

- Anh Luong, CISO at One of the Kids

## Control who gets in and keep threats out

Protecting your center starts at the front door. Instantly verify visitors against watchlists, issue mobile credentials to staff and contractors, and manage deliveries securely. Video intercoms and AI-powered cameras help ensure only authorized individuals gain access.

## Secure centers instantly during a lockdown

During urgent situations, every second matters. Wireless locks help secure classrooms and play spaces – no keys, no manual steps, no delays. Activate a lockdown from desktop or mobile to secure interior doors and help keep children and staff safe. Integrated video and access control means staff get real-time visibility into door status and movement throughout the center.

## Enhance visibility and reduce blind spots across the center

Stay on top of what's happening in nap areas, play spaces, classrooms and beyond with an easy-to-use video security system. AI-powered cameras enhance situational awareness, so staff can act on incidents early and have the complete picture during investigations, such as verifying child injuries, suspected unauthorized pick-ups or staff conduct concerns. With full visibility, childcare centers can quickly assess incidents, intervene faster and respond decisively.

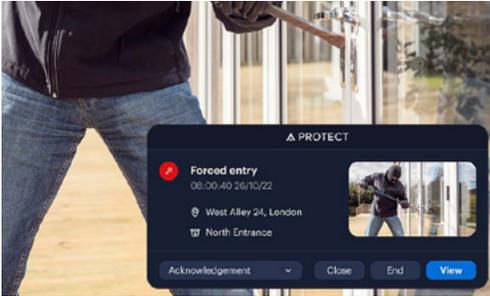

## Maintain safety in privacy-sensitive areas

In areas where cameras aren't appropriate, such as washrooms and nap rooms, smart sensors can help detect loud noise disturbances, air quality issues, staff or visitors smoking and vaping. Alerts link automatically to nearby security video footage to help provide context, allowing staff to respond appropriately.

## Strengthen your perimeter and stop threats early

From parking lots to back doors, secure your entire center perimeter with intelligent site protection. Receive alerts for loiterers, intruders and even individuals and vehicles on watchlists such as parents with restraining orders. Set custom door schedules to restrict access during operating hours and after. If you don't have dedicated security staff, professional monitoring\* offers round-the-clock protection with trained experts to visually verify alarms on your behalf and dispatch first responders as needed.

\*Available in U.S., Canada, U.K., Ireland, Australia, New Zealand only

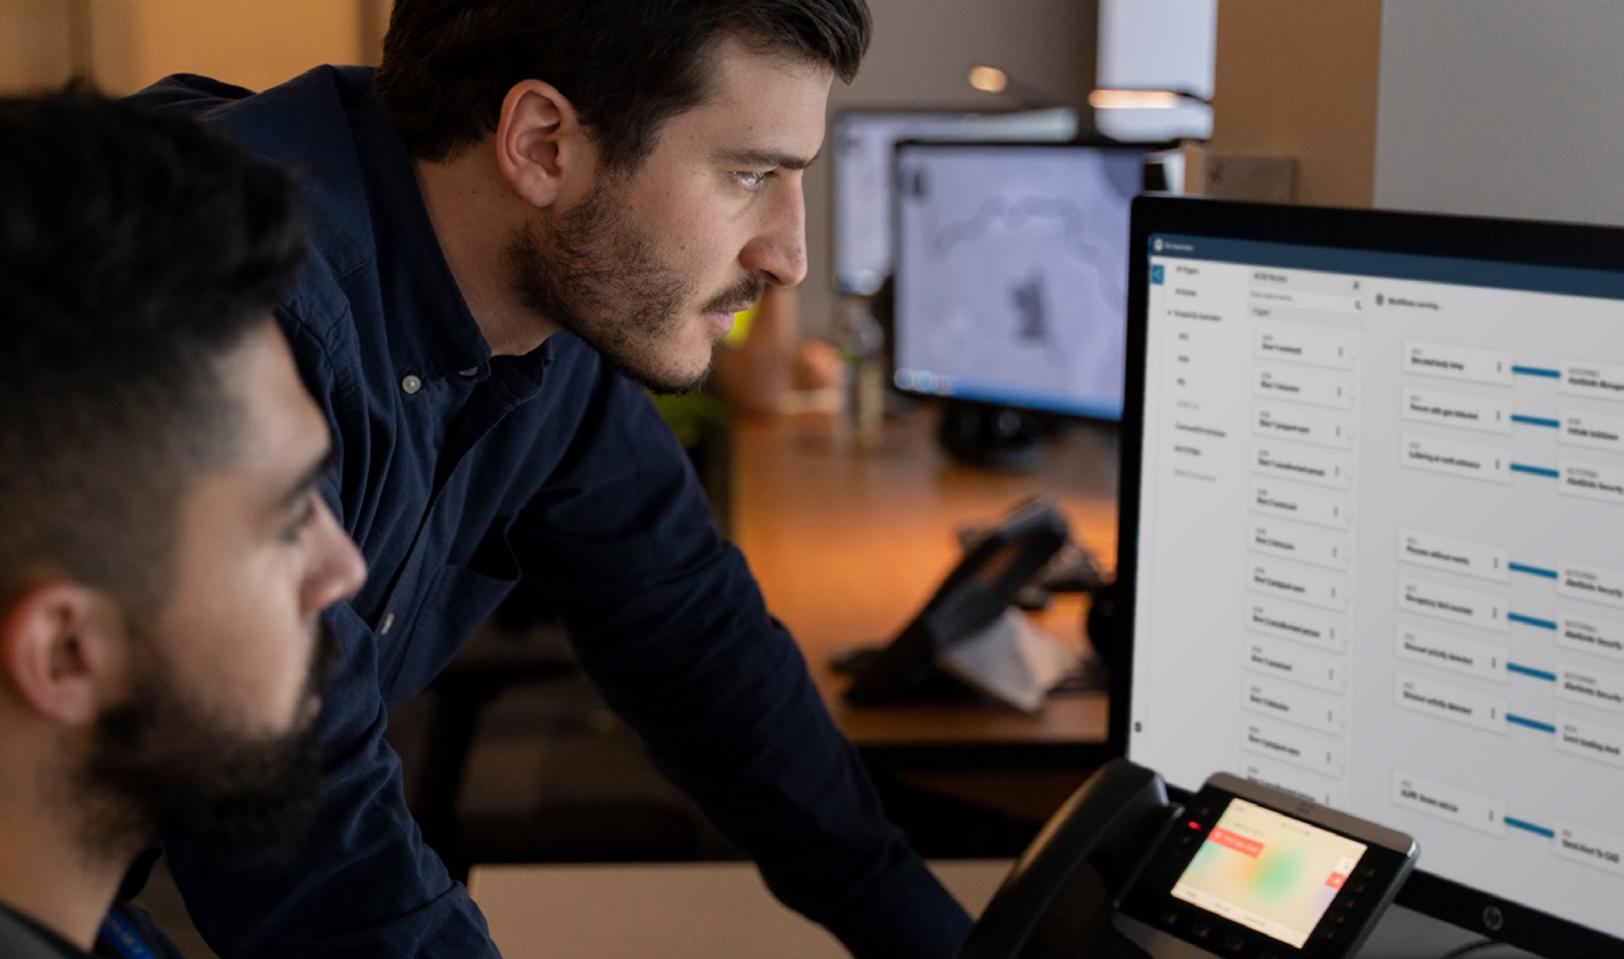

## Enhance child pick-up security with visitor management

Streamline check-ins, visitor logs and deliveries with a single platform that connects video, access control and visitor management. Pre-register parents or contractors, issue time-limited access passes, capture IDs, and link video security footage with visitor time stamps for compliance and investigations. This also strengthens child pick-up security and helps ensure only authorized individuals can enter the center.

# Part of something bigger

Your center's security technologies should work together, not in silos. That's why Alta integrates with the broader Motorola Solutions safety technology ecosystem through Orchestrate, a user-friendly automation tool at no additional cost. It's the only ecosystem that integrates video, access control, voice, data and more to offer seamless workflow automations that improve processes, speed up response times and enhance security.
